A highly motivated employee with a desire to take on new challenges. Strong work ethic, adaptability, and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills. Talented Software Developer equipped with great coding, debugging, and project management abilities. Accomplishes project goals consistently with elegant, scalable code. Works great with team members under Agile and Scrum frameworks.

## Skills

- HTML
- CSS
- Javascript
- Reactjs
- Bootstrap
- TypeScript
- git / GitHub
- Tailwind
- React-redux
- redux-toolkit
- Formik
- Framer Motion

## Experience

<b>React Developer</b> <b>Everish software infotech</b>	<b>11/2022 to Current</b>
<ul style="list-style-type: none"><li>• Developed React applications using Redux state management and RESTful APIs.</li><li>• I created custom components, forms, and interfaces for user interactions in React.</li><li>• Built reusable UI components that can be used across multiple projects with React.</li><li>• Optimized performance of existing React applications by utilizing best practices such as code splitting, and lazy loading.</li><li>• Monitored browser compatibility issues while coding layouts using HTML5, CSS3, and JavaScript along with other frameworks like Bootstrap when creating react apps.</li></ul>	

## Education and Training

<b>B Tech: Mechanical Engineering</b> Radha Raman Institute of Technology And Science	<b>06/2019</b> Bhopal
<b>Intermediate: I Sc (math)</b> Marwari College Ranchi	<b>04/2017</b> Ranchi
<b>Schooling</b> SS+2 High School Patratu	Patratu

## Projects

- **CRUD Application**

Technology Use = Reactjs ,react-router-dom, react-redux,redux-toolkit

Description =

Created a CRUD (Create, Read, Update, Delete) application using React.js, React Router for navigation, and React Redux with Redux Toolkit for state management. This project demonstrates proficiency in building a full-stack application for performing CRUD operations, providing a practical foundation for managing and interacting with data.

I completed this App with the help of Chatgpt and My Guide Mr. Shakir Hussain

This URL does Not Show the main functionality of this app because I used here fake JSON placeholder API and for this API I need to run the command npm run server which is not possible in the deployment

GitHub URL = [crud-application](#)

- Gym fitness -app
- Technology Use = react js, react-router-dom, Tailwind css, typeScript,redux-toolkit, Framer Motion, React Anchor Link Smooth Scroll

**Description =** Build and Deploy a Complete Typescript Fitness Application tutorial. For the front end, we will use React, Typescript, Vite, Tailwind, Hero Icons, Framer Motion, Form Submit, and React Anchor Link Smooth Scroll. We will also be using Vercel for deploying our app. This app was made by me with the help of ChatGpt my tutor MD Shakir Husain, and some references from YouTube also.

GitHub URL = [FitnesFreeK-app](#)

---

## Live Projects

- E-Commerce (Product App)
- Technology Use = react js ,bootstrap,react-router-dom , redux-toolkit etc
- CodsSandBox Url =<https://codesandbox.io/s/cartapi-data-s25jy7>

**Description =** I possess extensive expertise in web development, particularly in the e-commerce sector. Leveraging a comprehensive skill set, I have effectively utilized Bootstrap, CSS, Tailwind, React, React Router DOM, Redux Toolkit, and Redux Toolkit Queries to build and enhance e-commerce applications. These technologies have enabled me to design visually appealing and responsive user interfaces, ensure seamless client-side navigation, and manage complex state and data flow.
